

Cornerstone Systems & Solutions | Capabilities Statement

Company Overview

Cornerstone Systems & Solutions (CS²) is the consulting and advisory arm of Cornerstone Manufacturing Group, supporting the same mission to **advance U.S. manufacturing** through strategic execution and operational excellence. We partner with industrial OEMs, private equity-backed firms, and small to mid-sized manufacturers to solve complex challenges in operations, engineering, and value creation.

Core Capabilities

- **Operational Excellence & Lean** — Transformations, continuous improvement, system build and cadence
 - **Manufacturing Strategy & Turnaround** — Footprint, facility readiness, restructuring, scaling & optimization
 - **CAPEX Planning & Layout** — Full systems and lifecycle: concept, justification, layout, vendor coordination
 - **Project Planning and Execution** — Systems, management, execution and governance
 - **Interim & Fractional Leadership** — Ops, strategic and lean/CI roles
 - **Exit Readiness Advisory** — Build-to-sell, buyer readiness, risk reduction, and value creation
 - **Training & Digital Tools** — Practical systems and training for industrial teams and leaders
-

Why CS²

- Execution-first mindset — we've built, led, and scaled from the inside in corporate, PE, and SMB manufacturing supported by 25+ of experience
 - Trusted support for owners, executives, and PE partners
 - Fast traction: lean, focused engagements with tangible results
 - Buy-side lens: we know what drives value because we're operators and acquirers
-
